Creating a Risk Register

25/07/2026

Aim

To create a Risk Register using Microsoft Excel for identifying, assessing, prioritizing, and managing organizational risks.

Procedure

1. Open Microsoft Excel and create a new workbook.
2. Create columns for Risk ID, Risk Description, Asset/Process, Likelihood, Impact, Risk Score, Risk Level, Controls, Treatment, Owner, and Status.
3. Enter sample organizational risks and their details.
4. Calculate the Risk Score = Likelihood × Impact.
5. Classify risks as Low, Medium, or High based on their score.
6. Add suitable risk treatments, owners, and status for each risk.

Output

Risk register

Risk ID	Risk Description	Asset / Process	Risk Category	Likelihood (1-5)	Impact (1-5)	Risk Score	Risk Level	Existing Controls	Risk Treatment	Risk Owner	Target Date	Status
R-001	Unauthorized access to systems	User Accounts	Access Control	4	5	20 High	High	Strong password policy and access controls	Implement MFA and periodic access reviews	IT Administrator	2025-10-31	Open
R-002	Malware infection	Workstations	Cybersecurity	3	5	15 High	High	Antivirus and endpoint protection	Improve endpoint monitoring and patching	Security Team	2025-09-30	Open
R-003	Data loss due to backup failure	Database	Data Protection	3	5	15 High	High	Scheduled backups	Test backups regularly and maintain off-site copies	Database Administrator	2025-02-28	Open
R-004	Phishing attack	Email System	Social Engineering	4	4	16 High	High	Email filtering	Conduct awareness training and phishing simulations	Security Team	2025-11-01	Open
R-005	Unpatched software vulnerability	Server A	Vulnerability Management	4	4	16 High	High	Patch management process	Perform regular scans and timely patching	System Administrator	2025-08-25	Open
R-006	Unauthorized disclosure of sensitive data	HR Manage	Data Privacy	3	5	15 High	High	Access permissions and encryption	Conduct privacy impact assessments and review permissions	Data Protection Officer	2025-01-31	Open
R-007	Denial of service attack	Web Application	Network Security	2	4	8 Medium	Medium	Firewall and network monitoring	Deploy DDoS protection and traffic monitoring	Network Administrator	2025-11-15	In Progress
R-008	Insider misuse of privileged access	Admin Accounts	Insider Threat	3	5	15 High	High	Role-based access control	Implement privileged access monitoring and rotation	Security Manager	2025-03-31	Open
R-009	Physical theft of IT equipment	Laptops / Devices	Physical Security	2	4	8 Medium	Medium	Device locks and inventory tracking	Enable device encryption and improve physical security	IT Administrator	2025-11-30	Open
R-010	Cloud service outage	Cloud Infrastructure	Availability	3	4	12 Medium	Medium	Service monitoring and backups	Create failover and disaster recovery procedures	Cloud Administrator	2025-12-01	Open

Risk Scoring guide

Risk Score	Risk Level	Action
1-7	Low	Monitor and manage through routine controls
8-14	Medium	Additional treatment or monitoring may be required
15-25	High	Priority treatment and management attention required

Result

A Risk Register was successfully created in Excel containing identified risks, risk scores, risk levels, existing controls, treatment plans, risk owners, and status.
