

Experiment 5: Implementing Controls & Compensating Control Attestation

25/07/2026

Aim

To implement security controls in Eramba and verify their audit/attestation status.

Procedure

1. Go to **Control Catalog** → **Internal Controls**.
2. Create/import internal controls.
3. Select a control such as **Privileged Account Monitoring**.
4. Open **Edit** → **Audits**.
5. Set the audit date and select **Audit Owner** and **Audit Evidence Owner**.
6. Verify the audit methodology and success criteria.
7. Save the control.

Output

10 internal controls were created, and an audit/attestation plan was configured for **Privileged Account Monitoring**.

Internal Controls						
All Items	1 Approved	0 Failed	0 Items			
	Internal Controls	Name	Value	Description	Control Operator Contact	Related Policies
☐	☐	0	0	Privileged Account Monitoring	Privileged account activity is monitored and reviewed for suspicious or unauthorized activity.	Admin Admin
☐	☐	0	0	Vulnerability Scanning	Systems are periodically scanned for vulnerabilities.	Admin Admin
☐	☐	0	0	Incident Response	Security incidents are responded to in a timely manner.	Admin Admin
☐	☐	0	0	Risk Management	Security risks are identified, assessed, and managed.	Admin Admin
☐	☐	0	0	Network Management	Network traffic is monitored for suspicious activity.	Admin Admin
☐	☐	0	0	Backup and Recovery	Critical organizational data is backed up and can be recovered.	Admin Admin
☐	☐	0	0	Security Awareness Training	Employees receive regular security awareness training.	Admin Admin
☐	☐	0	0	Endpoint Protection	Endpoints are protected with anti-virus and other security software.	Admin Admin
☐	☐	0	0	Business Continuity	Plans are in place to ensure the organization can continue to operate during a disaster.	Admin Admin
☐	☐	0	0	Multi-Factor Authentication	Users are required to use multi-factor authentication for access.	Admin Admin
