

EXPERIMENT 1 — ESTABLISHING THE GRC HIERARCHY (AUTHORITY

DATE:13/08/2026 DOCUMENTS AND POLICIES)

Aim

To establish a GRC document hierarchy by creating an Access Control Policy and a supporting User Access Management Procedure.

Procedure

1. Log in to Eramba and open the policy/authority document section.
2. Click + Add Item and create Access Control policy.
3. Enter the description defining requirements for user access, authentication, authorization, access reviews and role-based permissions.
4. Set GRC Contact = Admin and Policy Reviewer Contact = Admin.
5. Set Status = Published, Published Date = 04-10-2026, Document Type = Policy and Version = 1.
6. Set Document Content = Use Content and enter suitable access-control policy content.
7. Set Policy Portal Permission = Private if available and save.
8. Create User Access management procedures.
9. Enter the description covering requesting, approving, provisioning, reviewing and revoking user access.
10. Set GRC Contact and Policy Reviewer Contact = Admin, Status = Published, Document Type = Procedure and Version = 1.
11. Enter the procedure content and save.
12. Verify both documents in the document/policy list.
